### Annex C (informative) Relative risk of damage and deterioration due to temperature

A visual representation of the relative risk of damage and deterioration due to temperature is given in Figure C.1 alongside the relative energy demand associated with maintaining a particular temperature.

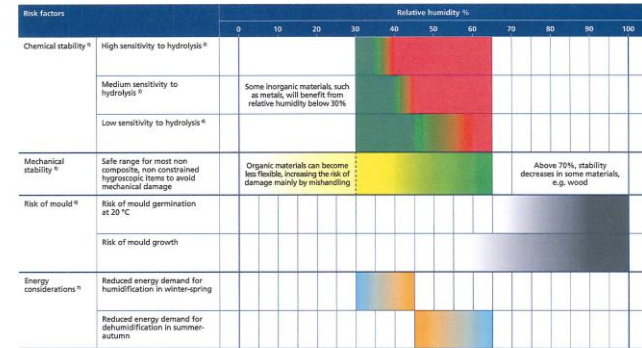

Figure C.1 – Relative risk of damage and deterioration due to temperature

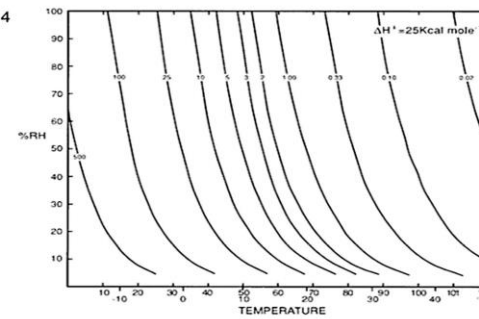

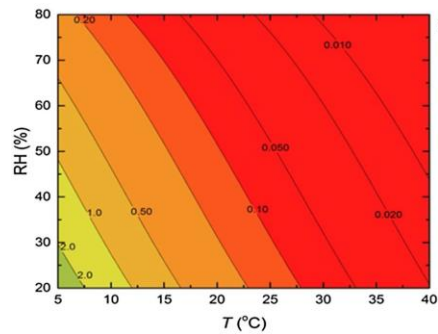

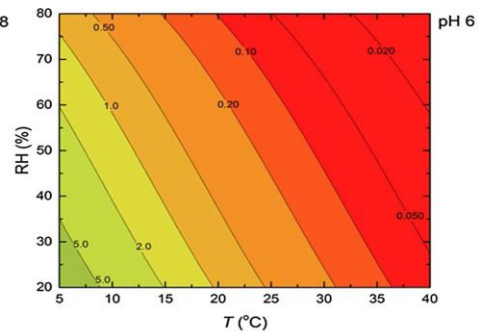

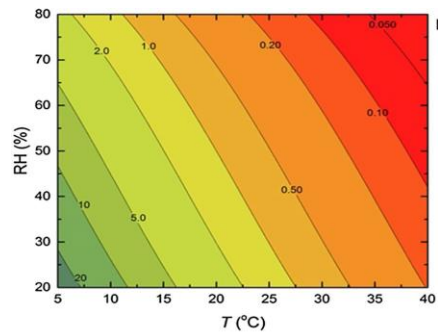

### Annex D (informative) Relative risk of damage and deterioration due to relative humidity

A visual representation of the relative risk of damage and deterioration due to relative humidity is given in Figure D.1 alongside the relative energy demand associated with maintaining a particular temperature.

Figure D.1 – Relative risk of damage and deterioration due to relative humidity

#### **Artikel 54a. Relatieve luchtvochtigheid en temperatuur van archiefbewaarplaatsen**

- 1 1. de relatieve luchtvochtigheid en temperatuur voor archiefbewaarplaatsen bedragen:
- a. 50% R.V. +/- 5% onderscheidenlijk 18°C +/- 2°C voor bewaring van:
    - 1°. papier;
    - 2°. perkament;
    - 3°. was;
    - 4°. leer;
    - 5°. textiel;
    - 6°. hout;
    - 7°. fotomateriaal op papier; of
    - 8°. optische schijven;
  - b. 35% R.V. +/- 5% onderscheidenlijk 13° C +/- 2°C voor de bewaring van zwart-wit negatiefmaterialen;
  - c. 38% R.V. +/- 5% R.V. onderscheidenlijk –20°C +/- 2°C voor de bewaring van zwart-wit negatiefmaterialen van di- en triacetaat en nitraatfilm en kleurnegatiefmaterialen;
  - d. 40% R.V. +/- 2% R.V. onderscheidenlijk 10°C +/- 2°C voor de bewaring van moederkopieën van tapes; of
  - e. 40% R.V. +/- 2% R.V. onderscheidenlijk 18°C +/- 2°C voor de bewaring van werkkopieën van tapes.
